THE CAESARSTONE SINK COLLECTION

Caesarstone, the company that pioneered
the world's first quartz countertop,
is proud to present its newest creation:

THE CAESARSTONE QUARTZ SINK

Forged from the same standard-setting materials that
Caesarstone is famous for worldwide the Caesarstone
Sink offers all of the advantages of a Caesarstone surface :
strength, beauty, durability, and ease of maintenance.

4003 Sleek Concrete sink & countertop, undermount installation

2141 White sink & 5131 Calacatta Nuvo countertop, undermount installation

MADE FROM NATURAL QUARTZ CRYSTALS

Caesarstone sinks are made from natural quartz crystals - the same materials used in Caesarstone's premium countertops and interior surfaces. Caesarstone's ultimate surfaces are stain, scratch and crack-resistant, impervious to heat and cold, and unaffected by common household chemicals.

In order to assure customers the same impeccable standards of quality in a brand new product category, Caesarstone innovated a unique manufacturing process that gave rise to the Caesarstone Quartz Sink - designed to enable both flat and undermount installation of sink into countertop.

TOTAL LOOK

Combining functionality, form and aesthetics, Caesarstone's sinks were specifically designed to match the colours and textures of its basic colour palette surfaces. When installed in a matching countertop, the sink and countertop deliver integrated cutting-edge technology with a sleek, uniform appearance.

LOW MAINTENANCE DECOR FOR MODERN LIVING

Like all Caesarstone surfaces, the Caesarstone Sink is designed, manufactured and tested to ensure low and easy maintenance. Requiring nothing more than soap and water or any other standard detergent, the Caesarstone Sink will retain its shine and continue looking like new for many years to come.
